Sterling Fitness — Wellness Agent Graph

Fan-out to 7 wellness lanes | Reduce to one results set per lane | Cross-check and score in code | Synthesize to the diary wiki

Sterling Fitness · SterlingLife
Agent Graph · draft v0.2 · 2026-10-27 · for owner review
Method only: no member results in this file

CONTROL PLANE

Evidence Ledger
Source record, date and protocol on every result.

Norms Library
Cited norms, reviewed yearly.

Capture Layer
App, test form, diary.

Assumption Register
Placeholders stay labelled.

Safety Flags
Positive screens go to G2.

Privacy Guard
Health data stays local.

runs beside every node

NEW TEST RESULTS -> N2

1 · INTAKE & SCOPING

- **N0** Member Intake & Goals — MemberContext (age band, sex, goals, limits)
- **N1** Scope & Age-Band Profiler — ScopePlan (agent roster, tests due, dates)
- **N2** Evidence Pipeline (service) — Evidence store + masked working copy
- **N3** Program Builder — Program (exercises and sets per week, versioned)

◆ G1 Plan Approval Gate — The member approves the program, roster, tests due and targets. Code first checks each body part is within target and limit, on 2+ days. Programs start on Sundays

2 · FAN-OUT — PARALLEL LANE AGENTS

28 agents (5 built) · roster by age band · isolated context | solid = built or recorded · dashed = proposed · FIT-T = technique table written

ST · Strength Training	CA · Cardio Training	CG · Cognition	NU · Nutrition	BA · Balance	HV · Hearing / Vision	SO · Social Engagement
ST1 50-64 · 65+ · FIT-T — Training Volume & Muscle Balance — BUILT	CA1 — Aerobic Volume (MET-minutes) — BUILT	CG1 — Cognitive Screen	NU1 — Body Weight Trend — DATA ONLY	BA1 — Single-Leg Stance	HV1 — Hearing Screen	SO1 — Loneliness Scale
ST2 50-59 — Grip Strength Test (50-59) — BUILT	CA2 — 2-Minute Step Test (60-94) — BUILT	CG2 — Mental Activity	NU2 — Protein Intake	BA2 — 8-Foot Up-and-Go	HV2 — Vision Screen	SO2 — Social Network Size
ST3 60-94 — Chair Stand & Arm Curl (60-94) — BUILT	CA3 — Endurance Test (50-59)	CG3 — Sleep	NU3 — Diet Quality	BA3 — Fall Risk Screen	HV3 — Exams & Devices	SO3 — Social Activity
ST4 — Load & Progression	CA4 — Daily Steps & Activity	CG4 — Modifiable Risk Factors	NU4 — Undernutrition Screen	BA4 — Balance Practice (yoga, tai chi)		
ST5 — Muscle Loss Screen	CA5 — Heart Rate & Intensity					

◆ G2 Screen Review Gate — A qualified reviewer confirms any positive health screen before it is reported

3 · REDUCE — ONE RESULTS SET PER LANE

merge · rank
trend
propose only

- **R-ST** Strength Results Set
- **R-CA** Cardio Results Set
- **R-CG** Cognition Results Set
- **R-NU** Nutrition Results Set
- **R-BA** Balance Results Set
- **R-HV** Hearing & Vision Results Set
- **R-SO** Social Results Set

4 · CROSS-CHECK

- **X0** Citation & Norms Verifier
- **X1** Cross-Lane Contradiction Detector
- **X2** Scoring Engine (code only)
- **X3** Re-Test Controller

◆ G3 Status Gate — Code sets Sterling Status; any safety flag goes to referral first

5 · SYNTHESIZE

- **S1** 925 Score
- **S2** Fitness Assessment
- **S3** Wiki Writer
- **S4** Plan & Referrals

◆ G3A Report Sign-Off — owner approves the pages

◆ G4 Release Gate — Nothing leaves the member's local store without prior written authorization (§1.9)

NEXT PROGRAM — S4 -> N3
CONDITIONAL RE-TEST — old test or thin eviden

DIARY WIKI -> Sterling Status · 925 Score · Fitness Assessment · Lane results with sources · Next-quarter plan · Referrals

Diamond invariant: agents never read each other's raw output — they contribute typed, cited results to a ledger; only the reducers and the cross-check layer compare across lanes.
Scoring invariant: code, never a language model, sets every score, z-score and pass or fail. The wiki is output only: it is rebuilt from the evidence and never read back as evidence.
Loops: the re-test loop runs inside a period; the program loop runs once per period, so a single run has no cycle. The member is scored on the program; G1 checks every program against the targets first.
Offline, not graph nodes: the yearly norms review, and evaluation against recorded tests.
